Initiativbewerbung als Senior QA Automation Engineer

Dear Team,

I have over 9 years of experience in software testing, with a strong focus on test automation, API testing, and CI/CD integration.

In my projects, I have built automation solutions using Cypress, Playwright, Selenium and Pytest, integrating them into existing development workflows. I have primarily worked on systems where multiple applications interact through APIs.

In addition to technical implementation, I collaborate closely with development and product teams to translate requirements into stable and testable solutions.

I have B2-level proficiency in German.

Availability:

Immediately available

Permanent residence permit

Open to on-site and remote roles

I would welcome the opportunity to discuss how I can contribute to your team.

Kind regards,

Mamatha Thatikonda.
