

Mamatha Thatikonda

Senior QA Automation Engineer

Personal Data

Location Hamburg, Germany
Contact (+49) 15163266329
Email mamatha.thatikonda@gmail.com

Professional Summary

QA Automation Engineer with 9 years of experience in test automation, backend validation, and distributed system testing across multiple client environments. Strong expertise in building scalable automation frameworks, validating API-driven architectures, integrating Shift-left Approach and CI/CD pipelines. Experienced in Cypress, Playwright, Selenium, and Python-based testing frameworks with exposure to cloud and containerized environments.

Work Experience

01/2025 – 02/2026 **Deutsch A1-B2**

04/2021– 10/2024 **Senior Analyst QA, Parakar GmbH , Hamburg**

- Worked as a QA consultant across multiple client projects, collaborating with stakeholders to refine requirements aligned with business and system dependencies.
- Designed and implemented automation frameworks using Playwright for a multi-application ecosystem, where multiple applications were interlinked and exchanged data via APIs.
- Validated complex data flow scenarios across interconnected systems where each application depended on others for request/response data, ensuring end-to-end consistency and system reliability.
- Familiar with monitoring tools such as Prometheus and APM solutions like Datadog for analyzing application performance, logs, and system metrics.
- Developed independent test frameworks and API test layers for each application, enabling isolated validation as well as integrated system testing.
- Implemented API mocking using structured test data files to simulate inter-service communication, reducing dependency on external services and improving test stability in token-based M2M authentication environments.
- Configured and validated DNS-level request routing setups in UNIX systems to ensure requests were correctly directed to application environments, handling complex network and environment configurations during test execution.
- Migrated automation suite from Cypress to Playwright to support multi-browser testing, improved parallel execution, and enhanced coverage for cross-browser compatibility scenarios.
- Integrated automation suites into CI/CD pipelines using GitLab, with containerized execution environments via Docker, ensuring consistent behavior across client infrastructures.

03/2019– 03/2021 **Senior QA Automation Engineer, Parakar GmbH , Hamburg**

- Automated document migration validation workflows using Pytest Framework(Python) in Unix Environments, triggering backend migration tasks and verifying successful document transfers in AWS storage locations, ensuring data integrity across high-volume migration cycles.
- Integrated automated test execution through Jenkins, enabling scheduled and on-demand runs of migration validation pipelines within CI/CD workflows.
- Defined migration scenarios using Cucumber feature files to clearly document expected behavior and improve collaboration across QA and development teams.
- Designed reusable validation flows to handle repeated migration batches, reducing manual verification effort and ensuring consistent results across releases.

- Debugged and validated network flows using Charles Proxy, including traffic routing for controlled test scenarios.
- Monitored QA metrics such as defect leakage, test coverage, and release quality to improve overall product stability.

11/2016– 02/2019 Senior QA Engineer, ValueLabs , Hyderabad

- Designed and executed comprehensive manual test cases for complex business workflows, ensuring high-quality releases prior to automation.
- Designed and implemented scalable automation frameworks using Selenium and Cucumber, creating reusable step definitions and improving collaboration between technical and non-technical teams.
- Integrated automation workflows into CI/CD pipelines using GitLab and Docker.
- Conducted performance testing using Apache JMeter, simulating high user loads to identify system bottlenecks.
- Performed root cause analysis of critical defects and collaborated with cross-functional teams for timely resolution.

Education

09.2008 - 08.2011	Masters in Computer Education Kakatiya University, INDIA
06.2005 - 06.2008	Bachelors in Commerce(Computers) Kakatiya University, INDIA
01.2025 – 03.2026	German B2 Telc GmBH, Hamburg

Skill Set

Test Automation Framework: Selenium, Cypress, Playwright, TOSCA, Appium

Languages: Java, JavaScript, Python(PEP8), Gherkin, Golang

CI/CD: GitLab, Jenkins

Testing Types: Functional, Regression, API, Mobile, Performance, Unit Testing

Test Management: JIRA, XRAY, Zephyr

Databases: MySQL, PostgreSQL, GraphQL

Tools: Charles, Fiddler, JMeter, GraphiQL, Postman, Cucumber, Docker

OS: Windows, Linux, macOS

Monitoring Tools: Datadog, Prometheus

Domain Expertise : Digital Marketing, Threat and Vulnerability Management, Cybersecurity, E-Commerce

Languages: English (Fluent), German (Professional), Telugu (Native), Hindi (Fluent)

Certifications

- ISTQB Certified Tester Foundation Level (CTFL).
- Tricentis Tosca Automation Specialist Level 1 (AS1) & Level 2 (AS2).
- Deutsch-Test für den Beruf B2 (DTB B2), telc GmbH - 2026
